

**IMPERIAL COLLEGE RESEARCH**  
**Tuesday 19th March**

Winslow Room - Covent Garden International House,  
16 Stukeley Street, WC2B 5LQ

We are developing a novel medical product and would be interested to canvass opinions from u3a members. Our research focuses on developing clothing with sensor technologies to gather health data. Given the reputation of members of u3as, we believe that iu3a (one of the seven u3as to whom this is being sent) would make an excellent contribution to our study.

To facilitate this collaboration, we are looking to establish a research focus group comprised of individuals from u3a. The purpose of this focus group is to gather qualitative data and engage in an open discussion regarding this technology. We believe that the diverse and rich experiences of your members would greatly enhance the depth and breadth of our research findings. We are hoping to identify around 8-10 participants.

The venue is booked from 10.00 until 14.00 with tea, coffee and biscuits upon arrival + lunch at 12.30 for everyone.
